Okra pods packed in foam or plastic trays and wrapped with polyvinyl chloride (PVC) film or linear low density polyethylene (LLDPE) film stored at 10±3°C (87% RH) was studied for extending their storage life. Okra pods packed in plastic trays and wrapped with PVC film had good appearance and storage life for 14 days. Weight loss of okra pods packed in plastic trays and wrapped with PVC film was less than those of okra pods in foam trays and wrapped with LLDPE film, plastic trays and wrapped with LLDPE film, foam trays and wrapped with PVC film which were 1.01, 1.26, 1.34 and 1.96%, respectively after 14 days.
