INTERACTIVE MATERIAL FOR EFL STUDENTS

Author : Charatdao Intratat

This is a demonstration of supplementary materials, which were designed for first and second year students at King Mongkut's University of Technology Thonburi. The materials consist of explanation and exercises with keys on “How to deal with tense?” These materials are computer assisted and interactive with authorware programs. The students get immediate feedback when they practice and access their performances from the scores like from playing games.

The audiences are invited to explore the materials. And comments or discussions are welcome.
